

KeyPadImages

The class KeyPadImages is used by the different KeyPad classes and contains bitmap data in form of tables, which are added to the image list of the Lse kernel.

Interfaces

Servers

ClassSvr	Is not used in the class, but can be used for calling global methods.
-----------------	---

Global Methods

GetImage	Adds an image from the Lse image list and returns the index of the image.
GetTitleLineHeight	Returns the fitting height of the title bar, depending on the used frame.
